

'Bien OOTTU' Industry

Project for Women-headed Families and Evening classes for the children

Building funded by Erkelenz Fur Sri Lanka e.v.

2019

Dear Jenita,

Greetings in the Lord!

We extend our thanks for the financial support provided, to put up the residence. When you visited our place we handed over a Report and request to put up a building for the Women – headed families and Evening classes for the children(20.10.2017). This building will be utilized to meet the following needs

- Increase in the number of children following these classes, since the space is insufficient, we conduct the classes under the trees, and there is need for building to conduct these classes.

- Whenever we organize programmes the rain disturbs the conducting of the items, meetings , capacity building and other functions.

- These women do have a place to take their meals.
- At present to carry out our work smoothly we need an Office, to maintain Records, to meet people and carry out the administration work.

We urgently need this building to implement this project. Though we had already submitted the project; in this there is the Budget and Plan of Building. This financial assistance will be a great help. Due to the rain and disturbances all the plans were disturbed.

May God bless you for all your financial support.
